

# LIVE ALL WEEK At the NASA Earth Science's BLUE WATERS CLUB

CATCH US IF YOU CAN

## The Bloomin' Algae Willy "Early Warning" BROWN Bad HABits

THE HOME PLANET PLAYLIST: CYANOBACTERIA ASSESSMENT NETWORK (CYAN)

Turn on, tune in, and read up on CyAN. This far-out application works to keep nature lovers safe from harmful cyanobacteria in the water. Algal blooms are the wrong kind of flower power — they can make anyone who swims near them sick and even kill pets. NASA scientists use satellites to sound an early alarm on blooms as they emerge in over 2,000 of America's grooviest lakes.
