# SE CONNECTER DANS LE UN BIODIVERSITY LAB

The screenshot displays the UN Biodiversity Lab Data Catalogue interface. At the top, navigation tabs include 'DATA CATALOGUE', 'SUCCESS STORIES', 'SUPPORT', 'ABOUT', and 'MY PROJECTS'. The main interface features a sidebar with a search bar, language selection ('Français'), and sorting options ('Trier par Titre', 'Date'). The central panel lists several datasets, each with a circular selection icon and a lock icon. The right side of the interface shows a world map with a dark overlay on the African continent. The bottom of the interface includes a scale bar (1000km), coordinates (Lat: 28.768 - Lng: -31.465), and logos for mapbox and mapx.

The City Water Map (CWM) contains information on the water sources for 534 cities internationally. The intake layer shown here includes information about the water intake, or diversion, for these cities, including the type of source the water is taken from. The CWM was used as part of a Science for Nature and People Partnership (SNAPP) working group on Latin America water security. It was also used as part of the Urban Water Blueprint analysis.
