Applied Remote Sensing Training (ARSET)

Applied Remote Sensing Training (ARSET)

<https://appliedsciences.nasa.gov/arset>

Delivers cost-free training on the use of Earth observations for decision making.

ARSET empowers the global community through remote sensing training.

ARSET Training Themes

Disasters

Agriculture

Ecological Conservation

Water Resources

Climate & Resilience

Health & Air Quality

NASA Applied Remote Sensing Training (ARSET)

- Cost-free
- Online or in-person
- Bilingual and multilingual options
- Only use open-source software and data
- Accommodate differing levels of expertise
- Live and instructor-led or asynchronous and self-paced
- Visit the [ARSET website](#) to learn more.

Active Fires

Learning Objectives

By the end of this training attendees will be able to:

- Identify the different remote sensing and modeled data for environmental monitoring.
- Use cloud computing to acquire and analyze time series of remote sensing data.
- Demonstrate how satellite data can be used to monitor and quantify changes in land use and land cover.
- Practice using satellite and modeled data for monitoring disasters (fire, flood, earthquake, landslide).
- Recognize how Earth observations are used in climate change monitoring and impacts.
- Identify passive (optical) and active (microwave) remote sensing data and how it relates to agricultural parameters.

Training Outline

Agenda: May 13 – 16, 2024 Thimphu Tech Park

- https://appliedsciences.nasa.gov/sites/default/files/2024-04/Agenda_Bhutan_1.pdf
- **Day 1 – Monday, May 13 – 8:00am-5:00pm**
 - Session I: Introduction and Overview of Earth Observations and Earth System Models
 - Fundamentals of Remote Sensing
 - Overview of Data Products from Earth Observations and Earth System Models for Environmental Monitoring
 - Session II: Climate Change Projections and Risk Assessment
 - Introduction and Background to Climate Change Projections and Analysis (Anomalies & Trends)
 - Introduction to Google Earth Engine (GEE)
 - Assessing Regional Climate Change & Impacts in Bhutan

Agenda: May 13 – 16, 2024 Thimphu Tech Park

- https://appliedsciences.nasa.gov/sites/default/files/2024-04/Agenda_Bhutan_1.pdf
- **Day 2 – Tuesday, May 14 – 8:30am-5:00pm**
 - Session III: Disasters – Floods, Landslides, Fires
 - Extreme Weather and Flood Monitoring
 - Surface Inundation Monitoring
 - Assessing Landslide Hazard Probability
 - Pre-Fire Risk Assessment
 - Active Fire & Post-Fire Assessment
 - Monitoring Pre- and Post-Fire Conditions

Agenda: May 13 – 16, 2024 Thimphu Tech Park

- https://appliedsciences.nasa.gov/sites/default/files/2024-04/Agenda_Bhutan_1.pdf
- **Day 3 – Wednesday, May 15 – 8:30am-5:00pm**
 - Session IV: Land Cover Mapping and Monitoring
 - Overview of Land Cover Products
 - Land Cover Mapping and Monitoring (Optical & Radar) – Forestry
 - Land Cover Mapping and Monitoring (Urban Growth)
- **Day 4 – Thursday, May 16 – 8:30am-5:00pm**
 - Session V: Satellite Remote Sensing for Agricultural Applications
 - Best Practices for Collecting Field-Based Training Data
 - Crop Mapping using a Time Series of Radar and Optical Imagery
 - Session VI: Exercises and Participant Presentations
 - Case Study in Participant's Area of Interest
 - Group Presentations
 - Closing Ceremony
